SQLite

PROJECTS

Todo List: **April-2023**

   Todo List project is an application specially built to keep track of tasks that need to be done. This application will be like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with their tasks they can mark as completed.
Technologies: *JAVASCRIPT*, *HTML, CSS, BOOTSTRAP*

- Displayed list of todos with HTML list elements, styled todo list using CSS, Bootstrap
- Implemented todo crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects and their methods during todo list, and persisted todo list state on page reloads using local storage methods.

Food Munch Website: **March-2023**

   Created a responsive static Food Munch Website that enables the user to navigate different sections using Navbar
Technologies: *HTML, CSS, BOOTSTRAP*

- Developed mobile-first layout using Bootstrap flex and CSS box model.
- Designed page by using HTML structure elements and by using different bootstrap components to show different sections in the website and different Bootstrap classes for responsiveness through mobile-first approach.
